

I claim:

1. A magnetic cover assembly for mounting on garage door panels, the assembly comprising:

a first sheet having a first planar side and a second planar side oppositely juxtaposed to one another wherein the first side is a magnetic layer to removably attach the first sheet to the garage door panel; and

a second sheet having a first planar side and a second planar side oppositely juxtaposed to one another wherein more than one sheet align to create an image encompassing more than one of the garage door panels.

2. The assembly of Claim 1 further comprising:

an image on the second side of the first sheet.

3. The assembly of Claim 1 further comprising:

a protective layer to connect to the second side of the first sheet.

4. The assembly of Claim 1 further comprising:

a light emitting material to attach to the second side of the first sheet.

5. The assembly of Claim 1 further comprising:

a light reflective layer to attach to the second side of the first sheet.

6. The assembly of Claim 1 further comprising:

a light reflective layer to attach to the images.

7. The assembly of Claim 1 further comprising:

a synthetic layer to attach to the second side of the first sheet.

8. The assembly of Claim 1 further comprising:

indicia to form the images.

9. The assembly of Claim 1 further comprising:

a decorative design to form the images.

10. A decorative display system for a door, the system comprising:

a plurality of door panels that connect to the door;

a plurality of magnetic sheets having a front side and a backside opposite one another wherein the backside attaches to the plurality of door panels; and

an image printed on the front sides of the plurality of magnetic sheets wherein a design is created by aligning the plurality of magnetic sheets on the plurality of door panels.

11. The system of Claim 10 further comprising:

indicia to form the image.

12. The system of Claim 10 further comprising:

a light reflective layer to attach to the front side.

13. The system of Claim 10 further comprising:

a light emitting material to attach to the front side.

14. The system of Claim 10 further comprising:

a protective layer to attach to the front sides of the plurality of magnetic sheets wherein the protective layer is transparent.

15. A method for decorating a garage door wherein the garage door is divided into garage door panels, the method comprising the steps of:

creating a decorative design;

separating the decorative design into a plurality of segmented images to connect to a plurality of magnetic sheets;

printing the plurality of segmented images on the plurality of magnetic sheets wherein the plurality of magnetic sheets have front sides that receive the plurality of segmented images; and

attaching each of the magnetic sheets to a corresponding one of each of the garage door panels to form the decorative design.

16. The method of Claim 15 further comprising the step of:

printing indicia on the front sides.

17. The method of Claim 15 further comprising the step of:

laminating the magnetic sheets.

18. The method of Claim 15 further comprising the step of:

attaching a protective layer to the front sides of the plurality of magnetic sheets.

19. The method of Claim 15 further comprising the step of:

attaching a light emitting material to the front sides of the plurality of magnetic sheets.

20. The method of Claim 15 further comprising the step of:

attaching a light reflective layer to the front sides of the plurality of magnetic sheets.
